Sushi Screenshot Website   Due Tue, April 9th @ 11:59pm

Instructions

1. In Eclipse, create a **Static Web Project** named **sushi_f*irstlast***, where ***firstlast*** is replaced by your first and last name. The project name should be in all lowercase, with no spaces. After creating the project, delete the folder named **WebContent**.

2. Download **Sushi Starter.zip** from ANGEL and extract all files.

3. In your new Eclipse project, create files named index.html, maki.html, and sushi.css. In these files, you'll need to include all markup and styling necessary to create the appearance given in the screenshot included in the zip file. The markup to use in the `div#main` elements of both HTML files is also included in the zip file, in **markup.txt**. Note: *do not change any of the provided markup, including the addition of class names.*

4. Compress your completed project to a zip file

5. Upload the zip file to ANGEL in the appropriate dropbox.

Styling Information

Backgrounds

- The area outside the wrapper has a background color of #4D4936.
- The area inside the wrapper has a background color of #FAF9DC and uses the background image sushi.png.
- The background color of the image's frame is #EDECDA
- The header has no background image.

Fonts

- The font used for the entire document is Helvetica, with two exceptions – the navigation menu and footer use Papyrus.
- The text color used for the document is #4D4936, except for the navigation links, which are black.
- Navigation links use are 18 point, the image caption is 9 point, the footer is 10 point, the home page definition word "sushi" is 18 point, with the other info to its right 16 point.

Borders

- The border around the wrapper has a width of 1 pixel and color of black.
- On the Maki page, the image border is 1 pixel wide and gray. The image itself is 200 pixels wide.
- All other borders are 1 pixel wide and use the color #4D4936.

Navigation

- The current page uses the background image bamboo-mat-texture-fade.png. All other pages have a background color of #D9D8BF.
- Hovering over a menu item (except the current page) changes its background color to #ECEBD0.

Header

- The header has only a clickable link leading to the homepage. This link fills the entire header, which has top and bottom padding of 20 pixels.

Layout

- The wrapper has a width of 900 pixels, and is centered horizontally, with top and bottom margin of 10 pixels.

Links

- Links that appear within the main content areas are not underlined, but when the visitor hovers over these links they should be underlined.
- All main content links (except the sushi definition links, which are bold) should be blue, even visited links.

Validation

- Your HTML file should pass HTML 5 standards, as validated at http://validator.w3.org.
- Your CSS file should pass CSS 3.0 standards, as validated at http://jigsaw.w3.org/css-validator.

Submission Errors

If for any reason you cannot upload your project, you must send an email to cjramey@mpsomaha.org with your project ZIP file attached.
